

- Dataset: Swedish Birth Register, with data on all births in Sweden from 2002 to 2005.
  - o Variables:
    - Birth year.
    - Birth weight.
    - Head circumference.
    - Maternal height.
    - Pregnancy duration.
    - Delivery type (natural, caesarean, instrumental).
- The dataset is too large to be cut and pasted, it has 201601 rows. If you wish to see it, you can find it in datasets→SBR2 on the preinstalled packages in R.
  - o This is the head of the file:
